Diploma in E-Commerce Web Development

This course explains how to use the PHP programming language to create a functioning e-commerce website from scratch. We introduce you to PHP and the Bootstrap CSS framework to enable you to market and sell products online. We also show you how to employ the open-source Atom editor, a powerful colour-coded interface that indicates whether code is correctly written. The course takes you through various web-development practices, including how to create drop-down menus (with classes, I.D).
