### jQuery Web Development and Programming

This short course will teach you everything you need to create dynamic websites using the jQuery JavaScript library. It begins from scratch, demonstrating the process of setting up jQuery on various platforms and the web. First, explore how elements can be selected using multiple properties such as their IDs, attributes, class, contained text and so on. Next, the course illustrates how to use jQuery to retrieve and set element values, attributes, classes and HTML.

## Modules Studied

Module 1: Introduction, Setup and Selectors

Module 2: Attributes, Values & Events

Module 3: HTML, CSS, Traversing & Effects

Module 4: AJAX & Utility Functions

Module 5: Course assessment
